## MyProjects

---

### Restaurant Management System

Django

- A restaurant management system with features like table reservations, user register and login
- OTP via emails is sent to the users when registering,
- Included features like session management,
- Admin portal (Default Django Admin Portal)

### Email Management System

Python

- A email management bot that verifies the spam mails and deletes them,
- Classifies the sender into important and unimportant groups,
- Deletes all the messages sent by the unimportant senders
